

Maureen Miranda
Computer Engineering

Company: **Barclays**

Job Profile: **Summer Intern 2025**

Offer Type: **Internship Only**

Internship Stipend: **75000/month**

CTC: -

Location: **Pune**, Maharashtra, India

Process Date: **12/09/2024**

Placement Process:

1. Technical Round (27 candidates appeared for this round)

To prepare for the technical round, I thoroughly reviewed the programming languages listed on my resume, while also revising core concepts in Object-Oriented Programming (OOP) and Database Management Systems (DBMS). I made sure to revisit the flow and structure of my projects to explain them clearly.

During the 30-minute interview, the interviewer asked detailed questions about my projects, including an in-depth explanation of the algorithms used in one of them. Additionally, I was asked technical questions related to various databases and the software development process. I also explained the tools mentioned on my resume. The questions were primarily based on the content of my resume, which for me involved web development and machine learning.

2. HR Round (15 candidates appeared for this round)

This interview focused on assessing both my technical knowledge and soft skills. In addition to questions related to my projects, the interviewer also tested my understanding of operating systems and Object-Oriented Programming (OOP). Questions like

1. What is defragmentation?
2. How does file allocation work?
3. How would you copy an object?

etc, were asked, which allowed me to showcase my knowledge in OS concepts and OOP principles.

Useful Tips:

1. Know your resume thoroughly and include only the tech stack you are confident in.
2. Revise key concepts in Operating Systems (OS), Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), and Database Management Systems (DBMS).
3. Understand the alternatives to the tech stack used in your projects and be prepared to explain why your chosen stack is the best option.
4. If you don't know something, be honest and express your willingness to learn.
