3. Online Aptitude Test: 28th June

Further rounds took place offline on 2nd July

4. Group Discussion
5. Interview Round 1
6. Interview Round 2
7. HR Round

Resume Screening

Your resume is as **very crucial** a part of the entire selection process as any other. Building your resume is a time consuming process, so allot enough time for it. Try to tailor your resume to the role you are applying for.

All resumes are screened by an ATS (Applicant Tracking System), so you can check your score on websites like "[ResumeWorded](#)". My resume had a score of 72.

Key points regarding resumes -

- They should be 1 page resumes as that's what is expected from freshers.
- Make single column resumes in Latex format.
- Try to include all **relevant** coursework / competition / projects / internships in your resume.
- Having 1-2 good finance projects on your resume helps.
- Participate in case study competitions.
- Do some finance certifications and add them onto your resume.

You can make minor changes to your resume that you are taking for your interviews. Results were announced 1 day prior OA Test around 9.

Online Assesment *(67 Students were shortlisted)*

The online test was conducted on campus. With a total of 45 marks, it consisted of 4 sections -

- Finance & Accounting (10): This section contains mostly accounting and corporate finance questions. I think it had 1 question about puttable bonds.
- Market Awareness (10): This section contained quite a few economy questions and market sentiment questions, I had something related to " what is the exemption on taxes for investing in government pension schemes", so focus on market situations and terms, be aware of

current affairs just to be safe

- Quantitative Aptitude (15): This section focused on permutations, probability, and algebra questions. So this one is out and out mathematics.
- Verbal Ability and Reading Comprehension (10): This is an English section, pretty simple if you try to stick with the basics.

The time given was 45 mins, so there is a **time crunch** as the **quant section is tough**, the VARC section is easy but time consuming. So try to segregate the sections into time slots so you can attempt as much as possible.

The results for this round were announced a day before the final day i.e. 1st July. So don't lose heart in the process and be prepared.

Group Discussion (37 students were shortlisted)

Group discussion Topic - "Central Banks' Diverging Paths Amid Geopolitical Stress - The Bank of England maintains rates at 4.25% due to global uncertainty, while Norway and Switzerland have opted for rate cuts. Explore how central banks should balance inflation control with growth risks, particularly in the context of conflicts or trade wars."

The moderators also introduced subtopics during the discussion. As far as I remember, these included "Views on Forex reserves", "What are the impacts of having different views and policy of central banks"

- Ensure you contribute at least 3–4 meaningful qualitative points.
- Try to work as a team, acknowledge others points and add on to it.
- Make sure you speak for 45 sec - 60 sec per point so the moderator takes note of you.
- The discussion time was 20 mins and last 10 min were for summary
- We had 3 panels for GD

Interview Round 1 (22 students were shortlisted)

The round consisted of accounting questions, Corporate Finance, puzzles, mental maths, market awareness. The following are the questions that were asked to me.

- The change in depreciation and taxes and what are its effect on the financial statements.
- Latest IPO and M&A
- What is capital restructuring and why is it done.
- I had made a DCF valuation project, so I was asked questions about it.
- I was asked to calculate 57×63 . Be sure to explain your approach.
- Other people were also asked the values of roots i.e 2,3,10 etc.
- I had done the forage investment banking simulation course, so a few questions on them.

The round lasted for 30-40 mins. I was last in panel but was called early which took me by shock. If you are not able to answer anything don't panic makes sure you tell the thought process and approach for it. If you make a mistake or there is some misunderstanding in what you were supposed to answer **DO NOT PANIC**, —your interview isn't over. One or two mistakes are acceptable so keep your head down and focus on answering the rest of the questions properly. Once the GD is done you might receive the order of interview, but always be ready there can be changes in last minute and you can be called anytime

Interview Round 2 (12-15 students were shortlisted)

This round was taken by the manager for CIB, the duration of this round was only 7-8 minutes. The round consisted of 30-35 rapid fire questions. I was asked to explain the DCF valuation model I had made. I was also asked questions on WACC, Beta, Financial Ratios, Talk about any stock for 30 seconds—its market capitalisation, stock value any and everything you know about it. I was asked if I invested in stock, to which I answered no. I was able to answer all the questions correctly. Make sure you are **thorough** with all the formulas.

My round 2 was scheduled a minute after my round 1 so be ready. Everything happens simultaneously and can be chaotic, so be relaxed, focused and calm.

HR Interview (10 students were shortlisted)

This round was informal and relaxed, lasted for 10-15 mins. I was asked to briefly talk about my resume and explain one of my leadership roles. I was asked about my family background. I was asked did I know what exactly my job role is and how my past work and leadership experience can help me to better in the internship.

10 students were selected for CIB banking role

Important Tips

1. **The core essence of the process is not about how much you know but whatever you do, how well-versed you are in it.** So focus on learning things deeply rather than trying to do a lot of things.
2. **Resources**
 - **CFI courses** - Accounting Fundamentals, Corporate Finance, Reading Financial Statements
 - **Udemy** - The complete investment banking 2025
 - **Forage** - Jp Morgan Investment banking job simulation
 - **YouTube** - [DCF valuation](#), [How are 3 financial statements linked](#), [2008 financial crisis](#), [SVB bank collapse](#), [what is SENSEX AND NIFTY](#), [how is GDP calculated](#), [Adani-Hindenburg saga](#),
 - **Puzzles** - GFG 100 puzzles
 - **Quants**- IndiaBix.com
3. During interviews, always maintain proper posture, have a smile on your face, do not panic even if you are unable to answer and at least let the interviewer know what approach you're thinking about.
4. The entire placement cycle is very hectic and stressful but it is important to stay in the present and study without worrying about external factors like market situation, recession, etc. Believe me, it never goes to waste. If you have prepared honestly, you will get opportunities.
5. If you have any questions,, I'll be more than happy to help. You can reach out to me directly on WhatsApp or LinkedIn.

All the best
